

Design and develop UI screens using React as per below specifications. You may use design framework / library of your choice.

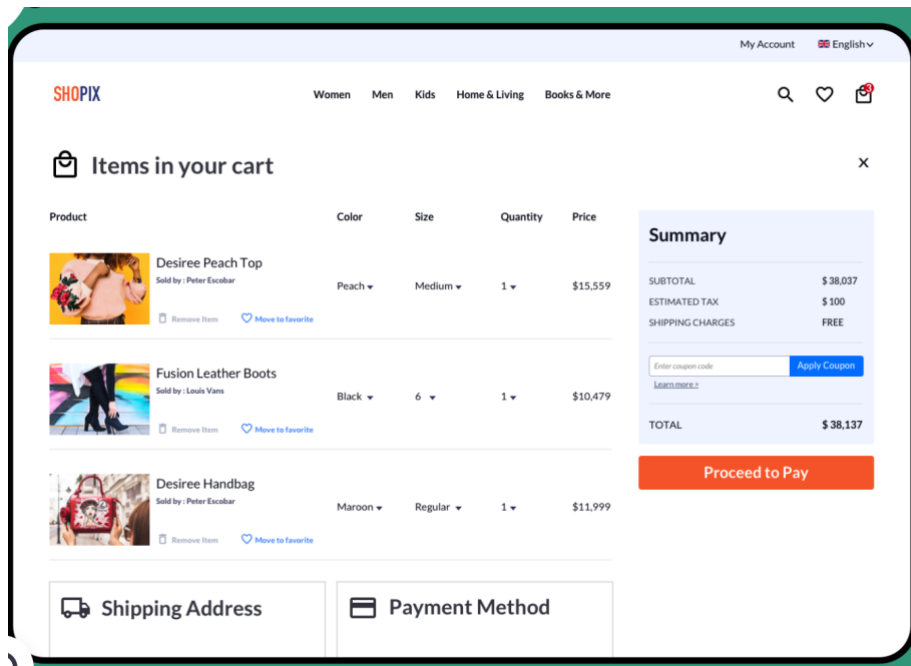

## Screen 1: Menu

### Requirements:

- Show items from below API call: GET <https://run.mocky.io/v3/9d71cb03-a9f9-4d70-bae2-9d3adaa1cfe7>
- Add and Remove items to / from Cart
- Show count and total amount of items added to cart
- Navigate to cart screen on click of "Cart >" button
- You may use open source images if it is not available in the API response.

## Screen 2: Cart

### Requirements:

- Remove items from cart
- Navigate back to Menu screen
- Clear cart
- When items are removed from cart, it should also reflect immediately on Menu screen when navigated back.
- Show total amount
- Discount based on below logic:
  - Total amount  $\leq 100$  : No discount
  - Total amount between 101 and 500 : 10% discount
  - Total amount between  $> 500$  : 20% discount

### Bonus:

Responsive UI
